

Vehicular SmokeBuster™

Under seat or dash mount – Model 3000 Series

Technical Specifications

Model	Power Source	Output Type	External Output Device
3010	3V Battery	Flashing LEDs	None
3040	12 volt DC	Wired relay	Fleet tracking system

Our 3000 series detectors will silently record or trigger a relay when sensing the combustive products of cigarette smoke. The count of events is displayed via a series of flashing LEDs. This detector employs state of the art microprocessor technology with a sophisticated algorithm to discriminate minute concentrations of cigarette smoke. It is the most effective way to stop smokers from smoking in vehicles.

Cigarette smoke dissipates very fast and is challenging to detect without false triggers. The model 3000 may take as much as 5 minutes to trigger and should be considered in situations where fast response time is not critical to its usage. For situations where immediate (1 second) response time is desired the CigaretteBuster model 52XX product line should be considered.

Specifications

Performance:

- Coverage: up to 25 sq ft
- Sensitivity: 10 ppm (average)

Physical:

- Length 3.5" (9 cm)
- Width 2.5" (6 cm)
- Thickness 1" (2.5 cm)
- Weight 5 oz (0.15 kg)
- Installation Velcro
- Installation time 30 seconds

Electrical:

- 2 AA batteries
- 12 volt DC
